EPA ID NO: MOD00818963

Dear Mr. Patterson:

This letter is to notify you that a final permit decision has been made to issue a Resource Conservation and Recovery Act (RCRA) Permit to operate a hazardous waste storage area at your facility located at Brown Road and Lindbergh (Tract I) in Hazelwood, Missouri. The decision was based on the belief that the information in your permit application submitted to the U.S. Environmental Protection Agency (EPA) is accurate and that the facility will be constructed and operated in the manner specified in that application.

We are also required to notify you that procedures for appealing a decision on a RCRA permit are available (40 CFR 124.19). Within 30 days of the final permit decision (by August 1, 1984) any person who filed comments may petition the Administrator to review any condition of the permit decision.

Enclosed is your copy of the RCRA permit and a list of the changes made to the draft permit. Because a request for a change in the draft permit was submitted, the final permit will not become effective until August 1, 1984. The effective date of the permit may be changed if a review is requested under 40 CFR 124.19 or an evidentiary hearing is held pursuant to 40 CFR 124.74.

If you have any questions about your permit or this letter, please do not hesitate to contact James E. Fleer of my staff at (816) 374-6531.

Sincerely yours,

David A. Wagoner  
Director, Air and Waste Management Division

McDonnell Douglas Corporation - St. Louis Tract I

Draft Permit Revisions

1. Permittee is changed from McDonnell Douglas Corporation - St. Louis Tract I to McDonnell Douglas Corporation.
2. The effective dates of the permit have been changed from July 1, 1984 through July 1, 1994 to August 1, 1984 through August 1, 1994.
3. Section III, paragraph A, has been modified to include six (6) additional hazardous waste numbers. This has been determined to be a minor modification to the draft permit because it does not allow additional storage capacity, and the additional wastes are of the same type as those already listed in the draft permit (EP toxic).
4. Section III, paragraph E.3, has been modified to include the additional wastes.
5. The "Environmental Pollution Control" section of Plant Engineering has been renamed "Environmental Compliance" in attachment IV. Additionally, several of the names, titles, and/or telephone numbers of the Emergency Coordinators have been changed in this attachment.
6. All departments having a 100-series number have been changed to an 800-series number.
7. Six (6) new Missouri waste streams have been added to attachment I.
